- I'm a merry little snowball, And I can knock you fish, De take right off your cranfum Your stylish beaver hat.
- Last night a little urchin
  Rvolved me in the yard,
  And threw me in the water-pail;
  To froms me round and hard,
- I'm sure that when I hit him I brought him little joy Regenue, instead of kicking me, He went and kinned the boy.
- And then a man stopped on mo, And falled to crush me flut; I dun't know what he did it for, But, somehow, down he sat.
- Hight of he selzed upon me— His rage was wild and valu— And harbed me widir through his own Hig parter sindow-pane.
- The thrity housewife used me To chase a vagrant hea! She nearly broke her shoulder blade— Why can't they throw like men.
- A younger brother found me, And plared with me awhite: With seaking chilibians off his hands His leinare he il beguite.
- He sent the dog to fetch me
  From out a light snow-wreath—
  The dog is now a sufferer from
  Neuralgic in the teeth.
- But in my fair young lifetime The Joy, the most intense, I feit when Johnny made me knock The tom-cat off the fence.
- I'm melting smaller, amalier, But peace in death is mine; They'll drop me down some fellow' To die along his spine.
- Though a merry little snowball— A snowball light and gay— I think I shall have some that Hefore I melt away.—Chings Tribuns.

#### MONITOR AND MERRIMAC. Union and Confederate Accounts

of Their Fight. The Union Officer's Story. The late Commodore S. D. Greene, in the Century War Series, writes of the

fight between the vessels Monitor and Merrimae, from which is taken the fol-"It was at the close of this dispiriting trial trip (her voyage from New York), in which all hands had been exhausted in their efforts to keep the novel cruft affort, that the Monitor passed Cape

gagement with the Merrimae, twenty time clapsed from the moment that miles away. He at once ordered the Worlen was wounded until I had ret keved up, and every preparation made for battle. As we approached Hampton Roads we could see the fine Hampton Roads we could see the fine old Congress burning brightly, and soon a pilot came on board and told of the d smay of the Union forces. The | ndiy, had started in the direction of

with me were Stoddard and Stimers in this she was completely foiled and

Our Captain, to the 'astonishment' of Merrimac, which had already commenced firing; and when he came within short range he changed his course so
as to come alonable of her, stopped the
engine, and gave the order "Commence
iring." I trieed up the port, ran out
the gun, and taking deliberate aim,
pulled the lock string. The Merrimac
was quick to reply, returning a rattling
broadside (for she had ten guns to our
two), and the battle fairly began. The
turret and other parts of the ship were
heavily struck, but the shots did not
penetrale; the tower was intact, and it
continued to revolve.

Merrimac, which had already commenced firing; and when he came withlowing: "At daybreak we discovered

pitched the day before.

'The fight continued with the exchange of broad-sides as fast as the well known. change of broad-sides as fast as the guns could be served and at very short der way and steamed out toward the trauge, the distance between the vessels frequently being not more than a few yards. Worden skillfully maneuvered his quick-turning vessel, trying to find some vulnerable point in his adversary. Once he made a dash at her stern, hoping to disable his screw, which he thinks he missed by not proved the vessels there is a passed again still closer. The Monitor was firing every seven or eight minutes, ing to disable his screw, which he thinks he missed by not more than two feet. Our shots ripped the iron of the Merrimae, while the reverberation of her thots account the temperature of her shots account the temperature of the shots account the shot shots against the tower caused anything but a pleasant sensation. While Stor-dard, who was stationed at the machine While Stor-draught was so poor that it was with the machine great difficulty he could keep up steam. which controlled the revolving motion of the tarret, was incautiously learning against the side of the tower, a large shot struck in the vicinity and disabled channel, white the Monitor, with only

"As the engagement continued the position and always have us in range of work ag of the turret was not altogether actisfactory. It was difficult to start contrate our fire on the pilot-house, and centrate our fire on the pilot-house, and it revolving or, when once started, to stop it, on a course of the imperfections of the novel machinery, which was now undergoing its first trial. Stimers was an active, muscular man, and did his utmost to control the motion of the terret; but, in spite of his effort, it was difficult if not impossible to secure accurate firing. The conditions were very different from those of an ordinary broadside gun, under which we had been truined on wooden ships. My only view of the world outside of the tower was over the muzules of the guns, which cleared the ports by a few inches

bearing. It finally resulted that when a gue was ready for ficing the turret would be started on its revolving journey in search of the target, and when found it was taken on the fly, because the turret could not be accurately controlled. Once the Merrimae tried to ram us, but Worden avoided the direct impact by the skillful use of the helm, and she struck a glancing blow which did no damage. At the instant of collision I planted a solid one-hundred-hand-eighty-pound shot fair and square upon the forward part of her casemate. Had the gun been loaded with thirty pounds of powder, which was the charge subsequently bearing. It finally resulted that when were knocked over by the concussion, der, which was the charge subsequently used with similar guns, it is probable that this shot would have penetrated her armor; but the charge being limited to fifteen pounds, in accordance with peremptory orders to that effect from the Navy Department, the shot rebounded without doing any more damage than possibly to start some of the base of the base of the base of the some of the base of the more damage than possibly to start some of the base of the more damage than possibly to start some of the base of the more damage was with the Monitor. Our casualties in age than possibly to start some of the beams of her armor-backing.

"Soon after noon a shell from the enemy's gun, the muzzle not ten yards distant, struck the forward side of the

the second day's fight were only a few wounded.

'The Monitor was well handled, and F. Mail. distant, struck the forward side of the pilot-house directly in the sight-hole, or slit, and exploded, cracking the second iron log and partly litting the top, leav-ing an opening. Worden was standing saved the Minnesota and the remainder of the fleet at Fortress Monroe. But her gunnery was poor. Not a single shot struck us at the water-line, where the ship was utterly unprotected, and ing an opening. Worden was standing immediately behind this spot, and re-ceived in his face the force of the blow. where one would have been fatal. Or had the fire been concentrated on any one spot the shield would have been pierced; had larger charges been used the result would have been the same. Most of her shot struck us obliquely, which partly stanned him, and, filling his eyes with powder, utterly blinded him. The lujury was known only to those in the pilot-house and its immediate vicinity. The flood of light rushing through the top of the pilot-house, now partly open, caused Worden, blind as he was, to believe that the pilot-house would be broken, but not penetrated.

—Soansads applied to gooseberry would be broken, but not penetrated.

## BISMARCK'S HOME.

Description of the Residence of the Ger-

"He was a ghastly sight, with his tyes closed and the blood apparently in hing from every pore in the upper part of his face. He told me that he Bogue, and then I assumed command. It is sometiment of the market value of the articles which he proposes to buy, and, while in a general way this may be a bird and suffering as he was, Worden's fact all, is soily a poor man. His soile appoint ment is not worth even £3,00). School that the Minnesota was saved he said. Then I can die happy.

"When I realised my station in the pilot-house I found that the iron log was fractured and the top party open, but this soil appoint mid that the iron log was fractured and the top party open, but the state of Friedrich was fractured and the top arty open, but the state of Friedrich was fractured and the top arty open, but the state of Friedrich was fractured and the top arty open, but the state of friedrich was fractured and the top arty open, but the state of friedrich was fractured and the top arty open, but the state of friedrich was fractured and the top arty open, but the state of friedrich was fractured and the top arty open, but the state of friedrich was fractured and the top arty open, but the state of friedrich was fractured and the top arty open, but the state of friedrich was friedrich when it reads the subject of the market value of the articles which he proposes to buy, and, while in a general way this may be admitted, it can not be expected that the average farmer is a scientific or even a well read poundlogist. It is a weak ment is not worth even £3,00). School has not offer all those chronic life falls, digestion is less perfect and assimilation slower and more food is, and the waste is greater. As the decline goes on, more and more food is, and the waste is greater. As the decline goes on, more and more food is, and the waste is greater. As the decline goes on, more and more food is, and the waste is greater. As the decline goes on, more and more food is, and the waste is greater. As the decline goes on, more and more food is, and the waste is greater. As the decline goes on, more and more food is, and the waste is greater. As the decline goes on, more and There is soarcely any thing remarka lost, that the Monitor passed Cape
Henry at four p. m. on Saturday,
March 8. At this point was heard the
distant booming of heavy guns, which
our Captain rightly judged to be an enpagement with the Morrimac, twenty ruhe itself. Yet there are several ob-jects of huxury and case, and others of de ideally historic impo tance. There is the rich carpet, extending through hall and rooms; the number of chim-neys, where, the whole winter through. a pilot came on board and told of the arrival of the Moritmac, the disaster to the Comberland and the Congress, and the Congress are the Congress and the Congres Monitor was pushed with all haste and reached the Roanoke (Captain Marston), anchored in the Roanoke (Captain M and her consoris were discovered at unchor near Sawall's Point. At about half-pust seven o'clock the enemy's vessels got under way and steered in the direction of the Minnesota. At the same time the Monitor got under way, and her officers and crew took their stations for battle.

"Worden took his station in the pilothouse, and by his side were Howard, the pilot, and Peter Williams, Quarier out the engagement. My place was in the turret, to work and light the guns;

with me were Stodiard and Stimers in this she was completely foiled and and sixteen brawny men, eight to each gun.

"Worden steered direct for the engage them as far as possible from the Minnesota. As he approached, the wooden vessels quickly turned and left.

The Confederate Officer's Accessor.

The Confederate Officer Officer Officer On the State of the English and France of the English and France of the State of the Confederate Officer On the State of the State Our Captain, to the 'astonishment' of Captain Van Brunt (as he states in his official report), made straight for the Merrimac, which had already commenced diring; and when he can with menced diring; and when he can with the Monitor, in the Cantury War Series, is quoted the following the figure and when he can with the Monitor, in the Cantury War Series, is quoted the following the figure and when the can with the Monitor.

penetrate: the tower was intact, and it continued to revolve. A look of confidence passed over the men's faces. she guarded. But in her size was one and we believed the Merrimae would great element of her success. I will the far stretching view from the window goose quilis and large pencils. Even the far stretching view from the window is in harmony with the discursive mind of the man who is reclining on one of itor; her build and peculiarities are from the Spartan nakedness of the rest of the house. It bodes peace and friendship to the State whose represen-tative is invited to Friedrichstuhe. Here Bismarck puts out the torch of hatred; to cultivate under his own roof amity and good understanding. Prime Orios and M. de Giers stayed there when the difficulties on the Baikan peninsula, besey, ch'ef engineer, reported that the

#### BURNS AND SCALDS. A Physician's Advice with Respect to

Probably the most common accidents that occur in the house, and which demand immediate attention, are burns and scalds. A burn may be caused by reet contact with the skin. A scald is produced in the same manner by boiltion to the skin of caustics, such as oil of vitriol or caustic, is usually followed by "eschars." The result, however, in either case is the same. The canses by which a person may

bursed or scalded are vari-While there are, doubtless, many which are purely accidental, yet not a few are the result of ignorance and gross carelessness. A prolific source of these accidents is the accidental practice of lighting fires with the aid of kerosene. It may be safely asserted that in our large blocks and boarding houses, where the rooms are heated by a stove, there are but few or their houses destroyed from such carelessness, might not be able to endure the suffering or withstand the loss. Such instances are con tantly occuring, and are likely to happen as long as this practice is continued. This may be digressing from the subject; but is it not of equal importance to warn people against danger as to instruct them what to do after the damage is done?

to do after the damage is done?
The treatment to be followed in case serves to increase the depth and sever-ity of the burns. It is also very rarely that one can successfully apply water to his own clothing or person, and thus axtinguish the discounter.

extinguish the flames.

Immediately upon one's clothes taking fire lie down upon the floor and the couches, while giving ample scope to his thoughts. The guest rooms are situated on the first floor. It need scarcely be asked that they are distinguished by comfort, ease and luxury from the Spartan pakedness of the state garments from burning deeper into the

from Only who has been severely burned great care should be exercised. Do not all good understanding. Prince Orlow and M. de Giers stayed there when the difficulties on the Baikan peninsula, between Hussia and Austria, were made up. Again, the visit of Baron Courcel, the French Ambassador, was the harbinger of the present ontente between France and Germany. On the other hand, Lord Ampthill diel without having ever seen the Chancellor, at least for the last eight months of his life. The moral of this is, perhaps, that when Sir Edward Malet is on his way to Friederichyruhe we may safely conclude that an Anglo-German understanding with a Liberal Cahinet in Downing street is no longer a contradiction.—London World.

A physician writes:

A physician writes:

"With anicidal indifference many disregard the laws of health. They cut indiges this food, they expose the misoves to suddon chmaise changes, they excessively strain the lieves, they give no heed to a daily evacuation of the bowels, they repress a natural desire to urinate, they indulge in harfful drinks, etc. Ere long their health completely fails. A state of impure blood, nervous depression, dyspersia, urinary disorders, partial paralysis, etc., follows. As a cure I cordially recommend Dr. Cuysott's Yellow Dock and Sarsaphyllla, which, in connection with careful disting and due attention to correct body halits, with regular hours of sleep, etc., will surely restore health. I consider it the best tonic, blood purifier and strengthener sold by druggists. It nots scotlingly and mildly, and never lowes now unpleasant after effects. Many have been misonabed at its marveso a cires, after all other remedica had failed."
